

Storage and Administration of Epinephrine at Public Schools

Public Act 14-176 (An Act concerning the Storage and Administration of epinephrine at Public Schools) amended the law to require the administration of epinephrine as emergency first aid to students experiencing allergic reactions, even if the student does not have parental authorization or the order of a qualified medical professional. Only in the absence of the school nurse, epinephrine may be administered by qualified school personnel who have completed the required annual training.

Please notify the school nurse in writing annually if you do not wish your child to receive epinephrine as emergency first aid by qualified school personnel in the absence of a school nurse.
